

Change GDM background in GNOME 3.2

Finnbarr P. Murphy

(fpm@fpmurphy.com)

Suppose you wish to change the background for **GDM** (GNOME Display Manager) to `/usr/share/backgrounds/zim2687.jpg`.

Here is how to do it:

```
# xhost +SI:localuser:gdm
# sudo -u gdm gsettings set org.gnome.desktop.background picture-uri
'file:///usr/share/backgrounds/zim2687.jpg'
# xhost -SI:localuser:gdm
```

Log out and you should see the new background when GDM restarts.
